Student Comments		
This was a great course. The content was very much relatable to my everyday life and it was good to participate in the class discussions.		
This was very clearly a 4th year course, building on previous material. I felt it demanded more. And I felt good about that		
I had issues in fully understanding what to do in assignments. It was confusing to understand where to study for the assignments.		
The Instructor's feedback were encouraging and up to date.		
I think the instructor is adequate for the course as she clearly has the education and experience to speak well on qualitative issues.		
My interactions with the professor were adequate, although I will say that she showed no mercy for incorrect assignments.
